

## LASER WITH RED DOT ADJUSTABLE FOCUS

### MODEL

1570064

### PRODUCT DESCRIPTION

Model 1570064 is a laser with a diameter of 20 mm and a housing length of 90 mm. This laser is powered by 10-32 VDC and creates a red laser dot. The 1570064 laser has an adjustable focus depending on the distance to the target. The laser has an IP class and temperature range that allows it to be used in moist, cold or warm environments. It can be used in many different applications, for example positioning tools, machines and vehicles. This laser ensures quality in various processes where the position is important or serves as a support or guide for the person handling the machine or vehicle.

### TECHNICAL DATA

Input voltage	10-32 VDC
Rated power	100 mW
Cable length	1000 mm with open end
Length	90 mm
Diameter	20 mm
Temperature	-10 to +50 C°
IP Classification	IP54
Certification	CE
Beam	Dot 110°
Laser Class	2M
Wave length	520 nm
