

WIRELESS 2,4 GHZ HD DIGITAL VISIR CAMERA

MODEL

3087140

PRODUCT DESCRIPTION

Exolöf wireless digital visir camera is a robust camera with HD quality. The camera is equipped with a visir that is automatically closed when the camera is inactive, the visir protects the camera lens from pollution such as dirt and water. The camera comes with a selection of various opening angles, ex. 110°, 130° etc, which is suitable to be used as an rearview camera for vehicles. With a transmitting distance up to 300 meters it is a good option for most transport applications such as trailers, but also industrial production machinery that needs monitoring. Combine this camera with one of Exolöf wireless monitors to be used with a total of 4 cameras simultaneous.

TECHNICAL DATA

Input voltage	10-32 V DC
Image device	½.9" CMOS
Effective pixels	1920x1080
Minimum illumination	0.1 Lux (Day) 0 Lux (with IR)
Nightvision	Yes IR
White balance	Auto
Operating frequency	2403 – 2478 MHz
Decompression format	H.264
System format	PAL/NTSC
Transmitting distance	300 meters
RF Bit rate	12 Mbps
Weight	0,8 kg
Microphone	Yes
Temperature	-20 to +70 °C
IP Classification	IP69K
Time delay	170 ms
