1 CHANGE MANAGEMENT

CHANGES	INDEX	DATE	PAGE(S)	INITIALS
New version	1	June 98	/	R. GABORIT
Page added on changing actuator configuration	2	July 98	11	R. GABORIT
Add spare parts	3	July 98	14 à 26	R. GABORIT
Addition of Note, No. 47 and DCX4 diaphragm valve spacer	4	November 98	9/18/26	R. GABORIT
Addition of tool and seal kit list page	5	January 99	11/27	R. GABORIT
No. of DN38 DCX4 valve changed	6	June 99	26	R. GABORIT
Addition of reference 48 to spare parts + Note	7	September 99	26 and 3	R. GABORIT
References 25 and 36 changed and seal kit added	8	November 99	19/20/25/26/27	R. GABORIT
DN125/150 spare parts added	9	May 2000	27	R. GABORIT
DN125/150 spare part reference 34 changed in spare parts	10	August 2000	27	R. GABORIT
Ring reference 24 number changed	11	November 2000	26/27	R. GABORIT
Ring and new No. added to aseptic lantern	12	March 2001	19/20/25/26/27	R. GABORIT
No. of DN3" DCX4 Plug 7005609 was 7007609	13	May 2001	27	R. GABORIT
Plug reassembly comment added	14	October 2001	13	R. GABORIT
Comment added on changing configuration. + e.g.: grease	15	February 2002	10/11	R. GABORIT
New US version of aseptic DCX3 added	16	March 2002	20/27/28/29	R. GABORIT
DN 4"/104 seal ref 24 changed	17	October 2002	28	R. GABORIT
DN80/104 ref 34 changed	18	October 2002	28	R. GABORIT
NITRILE R-ring ref. 36 for aseptic seat valve deleted	19	January 2004	19/20/21/26/29	R. GABORIT
2 pages + comment added, N125/150 ref 26 and 38 modified	20	October 2005	13/18/19/26/27/29/30	R. GABORIT
Aseptic version ref 25 and 38 changed	21	January 2007	29/30	D. VINET
Notice completely re-written following change to 2-part lantern	22	October 2007	All	R. GABORIT
Parts, seal sets, diaphragm & alcohol barrier valves changed	23	September 2008	2/19 to 22/27 to 42	G. ANDRE
Add DN80 DIN for aseptic 3A valve	24	Avril 2009	27/34	G. ANDRE
Update notice	25	September 2009	16/22/23/26 to 39	R. GABORIT
Add ring ref 67	26	November 2009	16/26/27/30	R. GABORIT
Add locking kit	27	October 2011	5	G. BEGAUD
Information split in two different documents (one for standard DCX valves NM-036 and a second one for other configurations NM-251)	28	March 2012	All	G.BEGAUD
Adding reference : 18 bis (lantern DN125-150 O'ring Ø4)	29	March 2012	9/10/14/16/17	T.PICOT
Adding safety devices	30	October 2015	6	G.BEGAUD
Add clamp collar tightening torque	31	August 2016	14	G.BEGAUD

2 SAFETY

2.1 IMPORTANT INFORMATION

Always read the maintenance notice before manipulating the valve

Failure to observe these instructions can result in serious bodily injury or loss of life.

This can also result in less serious injuries or damage to the equipment.

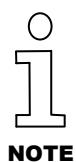

Electricity can result in serious bodily injury or loss of life.

This can also result in less serious injuries or damage to the equipment.

2.2 GENERAL INFORMATION

The following advice is given to ensure optimum use of the equipment.

- The tasks must be performed in the order specified.

MAINTENANCE NOTICE Automatic DCX3 & 4 floating seal changeover valves.

3 INTRODUCTION

The disassembly process for DCX3 or DCX4 changeover valve is divided into two distinct steps :

3.1 DISASSEMBLING THE VALVE (Extracting the actuator and Plug assembly from the body of the valve)

This operation enables access to the plug seals (Changing the seals) and the removal of the actuator.

This is a straightforward procedure and can be performed on-site as it does not present any particular problems.

This is the case in the majority of maintenance operations on this type of valve.

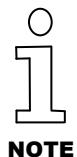

3.2 DISASSEMBLING THE ACTUATOR (Changing the internal seals)

DANGER !

CAUTION: This operation must be performed using a special tool ensuring that the necessary precautions are taken. (**STRESSED SPRING**)

For changing from a NC valve to a NO or double-acting valve and vice versa, see "Changing configuration".

NOTE

NOTE: After carrying out any maintenance work on DEFINOX products it is essential that you check the correct function of the equipment concerned: tightness, pressure, etc...

3.2.1 Safety devices

For the maintenance of NC and NO actuators, we offer on request maintenance sets preventing unintended operation of the plug when the actuator is supplied with air.

RISKS

When changing seals: Risk of trapping fingers between the actuator axis and the top of the seal plate

DCX3/4 NC (rod out)

SOLUTIONS

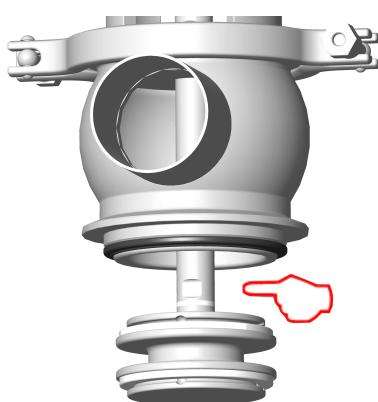

Maintenance tools for the NC actuator

DN	Reference
DN25 - 40	7814986
DN51 and DN63 – 76	7814972
DN80 – 104	7814987
DN125 - 150	7814988

RISKS

When fitting and removing the valve:

Risk of trapping fingers between the valve and the valve body

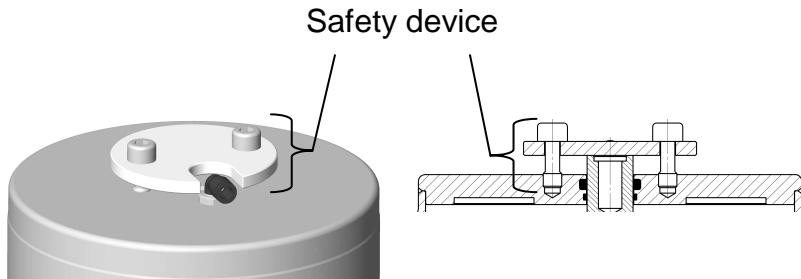

DCX4 NO (rod in)

SOLUTIONS

Maintenance tool for NO actuator

DN	Reference
DN25 – 150	7814976

A tool case reference 7815030 is available which includes the following tools:

- 7814986 ⇒ Maintenance tool for actuator NC DN25-40
- 7814972 ⇒ Maintenance tool for actuator NC DN51-76
- 7814987 ⇒ Maintenance tool for actuator NC DN80-104
- 7814976 ⇒ Maintenance tool for actuator NO DN25-150

4 DISASSEMBLING THE VALVE

Before starting the disassembly procedure, if the valve is fitted with a signalling box it may be necessary to detach the signalling unit from the actuator.

4.1 DISASSEMBLING THE SIGNALLING BOX

Dismantling without disconnection

IMPORTANT: Before starting any work on the box, it is important to ensure that the air supply is closed and that the circuit is purged.

Dismantling with disconnection

IMPORTANT: Before starting any work on the box, it is important to ensure that the mains supply is switched off, that the air supply is closed and that the circuit is purged.

To fit and remove the control top, refer to maintenance notice:

ICS LED
Maintenance notice
NM-258

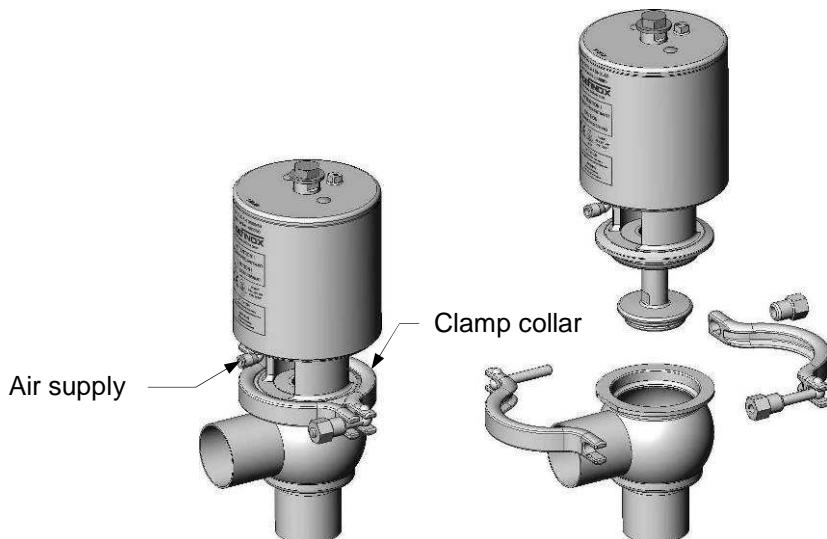

ACS LED
Maintenance notice
NM-259

For the previous generations control top, refer to maintenance notice:

- **NM-182 for the ICS control top**
- **NM-187 for the ACS control top**

4.2 DISASSEMBLING THE DCX3 VALVE CLAMP COLLAR

- Supply air to the NC actuator to relieve the pressure on the clamp collar from the spring,
- Disassemble the clamp collar,
- Switch off the actuator air supply,
- Remove the actuator and plug assembly from the DCX3 body.

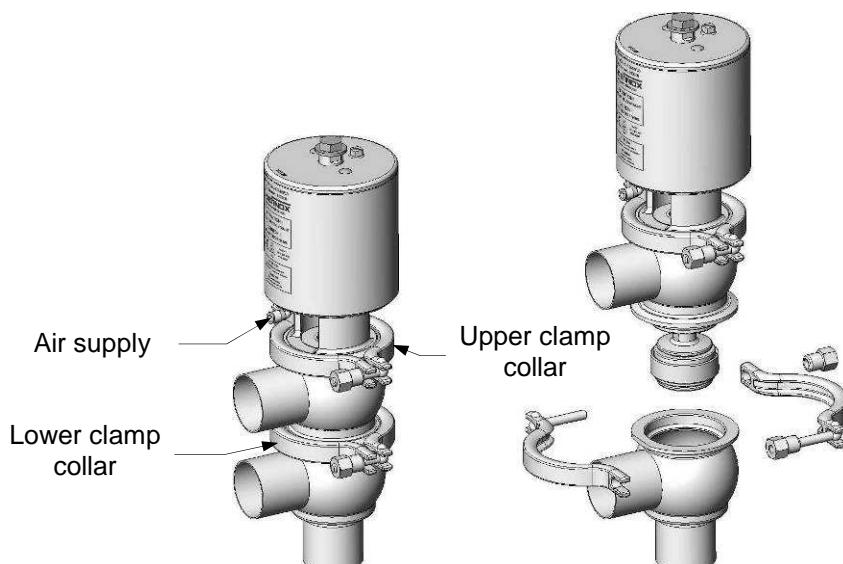

4.3 DISASSEMBLING THE DCX4 VALVE CLAMP COLLAR

NOTE:
1
NOTE

NOTE: If the upper body is installed between couplings, it may be easier to dismantle it and remove it together with the plug assembly of the DCX4 valve.

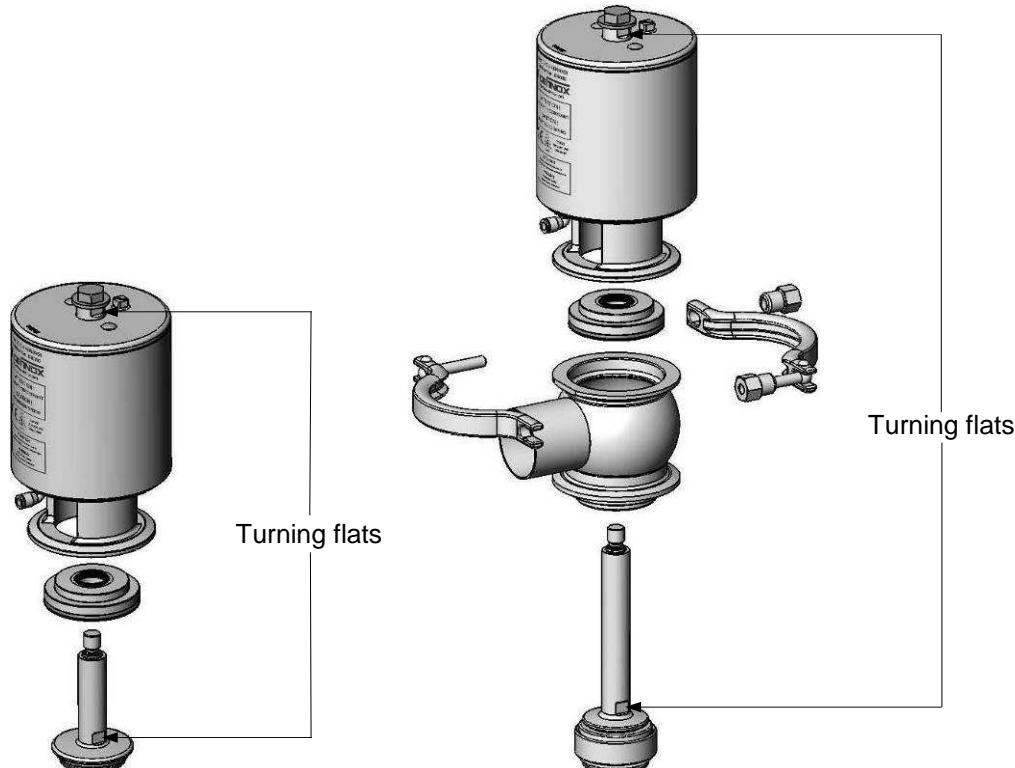

In any cases, the bodies have to be moved apart in order to dismantle the valve.

- Supply air to the NC actuator to relieve the pressure on the clamp collar from the spring.
- Disassemble the lower clamp collar.

4.4 DISASSEMBLING THE DCX3/4 PLUG

- Unscrew the plug by means of the turning flats on the valve and on the actuator stem then remove the seal support plate.
- For the DCX4 valve, remove the upper clamp collar to separate the body from the actuator assembly then remove the seal support plate.

4.5 DISMANTLING THE ACTUATOR

4.5.1 Dismantling the accessories

Remove the air connection, the pierced cap, the plastic caps as well as the screw and the washer of the stem.

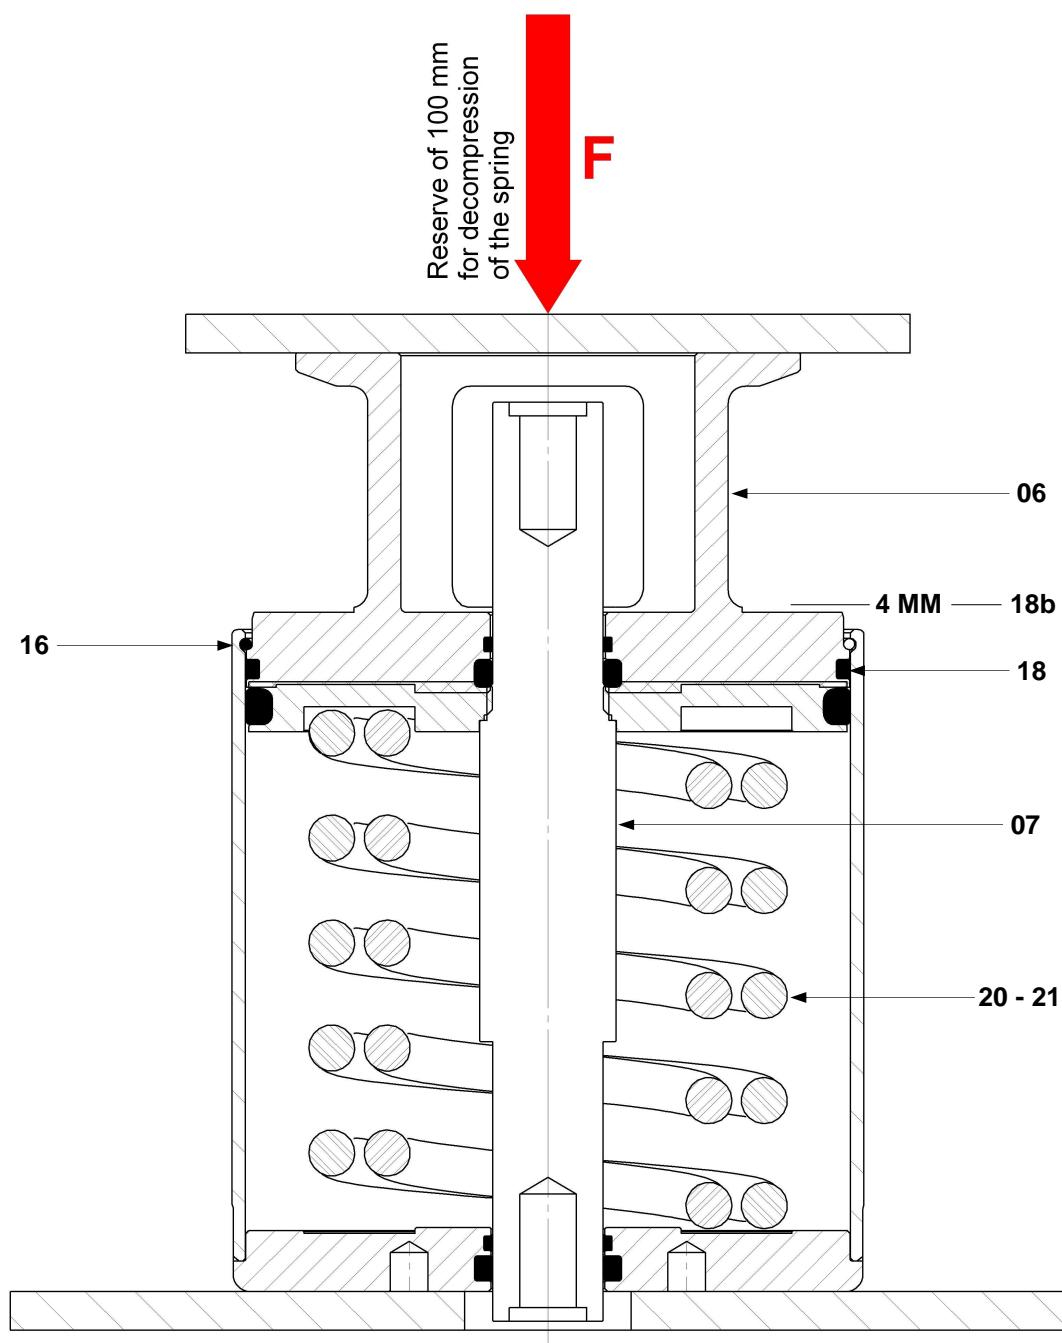

4.5.2 Dismantling the internal components of the actuator

CAUTION: This is a hazardous operation if performed without using the correct tools. We recommend using a hydraulic press or a tool of the type shown in the diagram opposite (This tool must be made to accommodate a spring expansion of 100 mm).

With the actuator placed in vertically:

- Push down the lantern [06] to remove the snap-ring.
- Remove the snap-ring [16] from its recess using a small screwdriver.
- Release the pressure to allow the lantern to rise back.
- Take out the lantern together with its seal (18) or (18b) for DN125-150 marking of the lantern 4MM.
- Remove the stem/piston [07] and the spring(s) [20-21] from the actuator body.

5 CHANGING SEALS AND REASSEMBLY

5.1 INTRODUCTION

Our valve components are listed and referenced in this document, together with the information necessary for ordering your spare parts.

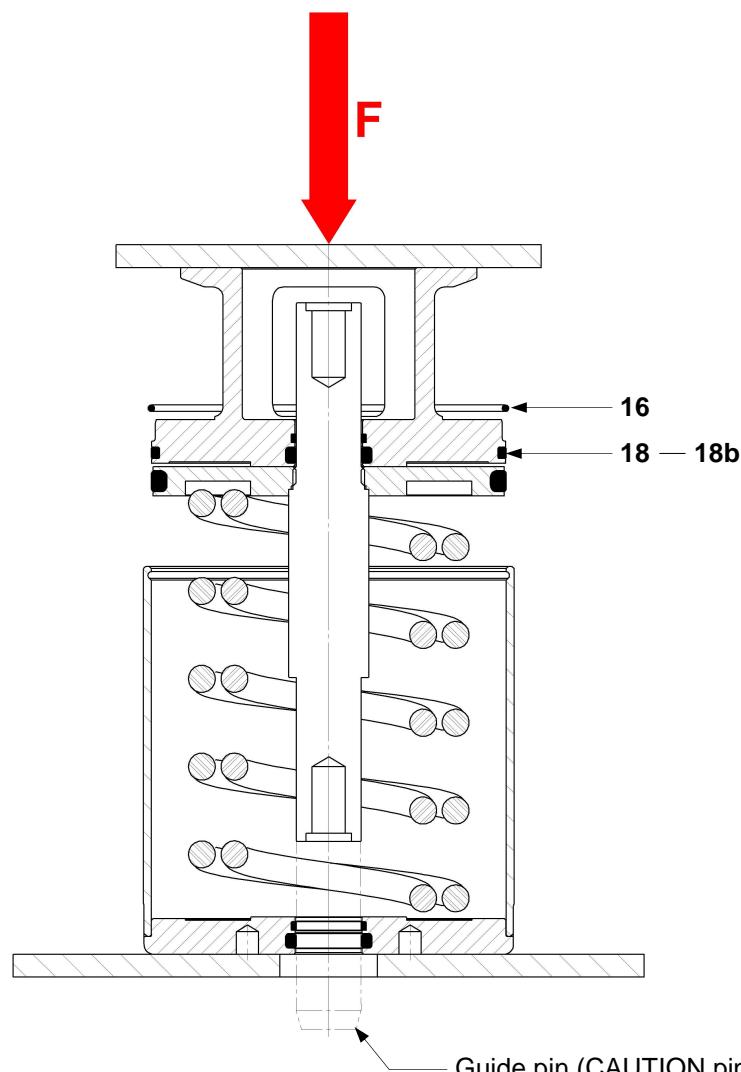

5.2 ASSEMBLING THE ACTUATOR

CAUTION !

CAUTION: For changing the actuator configuration from **NC** (Normally Closed) to **NO** (Normally Open) or **DA**. (Double Acting), see the following chapter.

This procedure is performed in the reverse order to dismantling. However, it is necessary to take into account the following information:

- A guide pin centered on the actuator stem ensured that the piston is properly centered in the body. It also avoids also avoids the piston jumping if the spring(s) slip(s) sideways during compression,
- Before reassembling the parts, ensure that the assembly is lubricated with an appropriate lubricant (water-resistant and temperature-resistant food grade → E.g., for information: 4025 H1 QUINPLEX by Lubrication Engineers). Ensure that the grease used is compatible with the elastomer seals,
- Take care not to damage the lantern seal [18] [18b] when fitting it with the press,
- Ensure that the snap-ring (16) is properly positioned in the recess of the body before releasing pressure,
- Test operation of the actuator before continuing assembly.

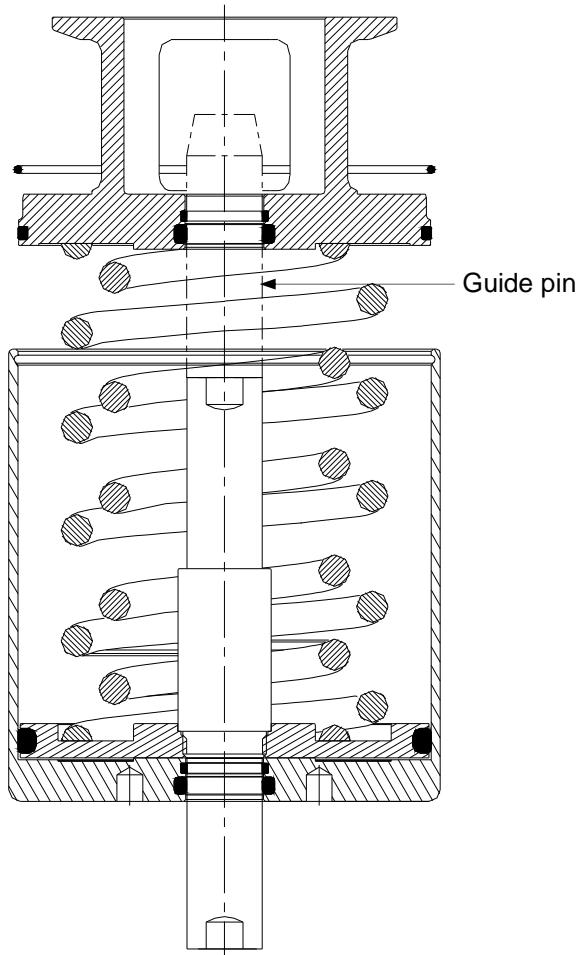

Guide pin No.	
DN	references
25 - 40	73 00453
51	73 00454
63 - 76	73 00455
80 - 125	73 00456

5.3 **CHANGING ACTUATOR CONFIGURATION**

Transforming an **NC** actuator into a **NO**:

After opening the actuator, refit the stem/piston and spring assembly the other way around in the body.

NOTE!

NOTE: For your own safety, check that the snap-ring is properly positioned in its recess. If the snap-ring is damaged or deformed, it must be replaced.

NOTE: For DCX4 NO, there is a possible movement of the actuator body during the opening / close operation.

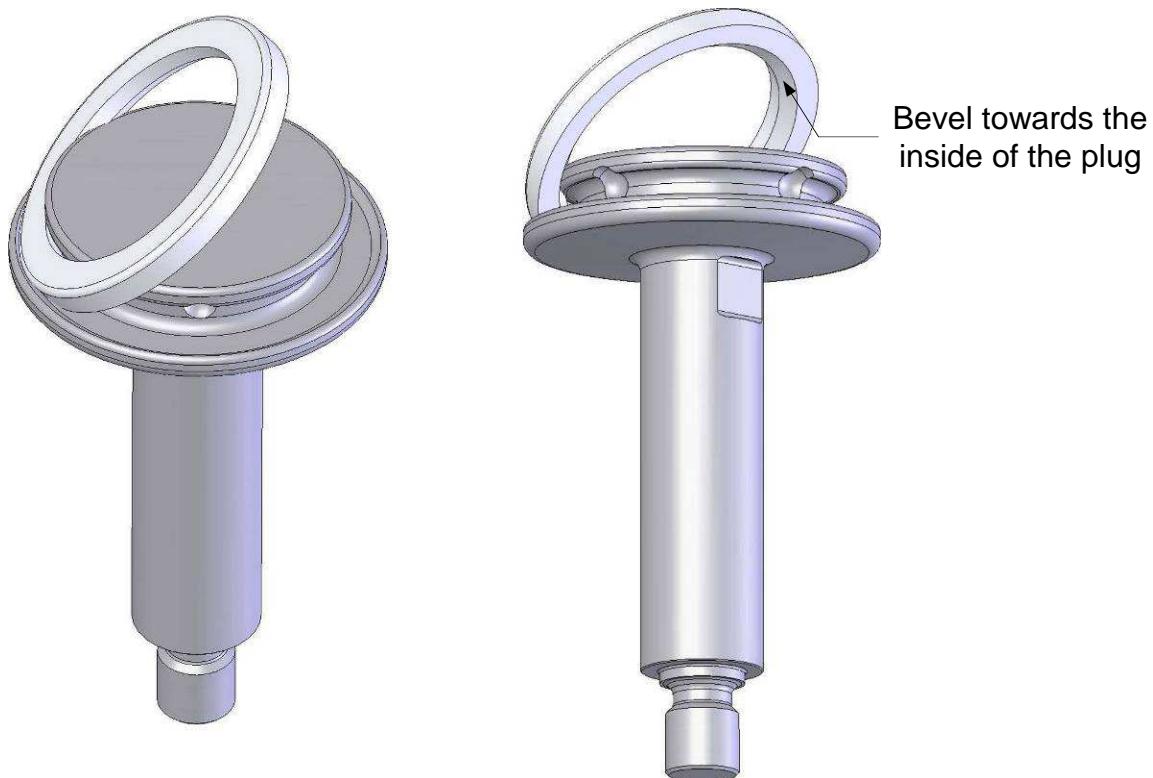

To change PFA seals, follow the guidelines given below:

- Remove the defective seal using a cutter taking care not to mark the bearing surface of the plug (protect the stainless steel surface using the edge of a steel rule or a plastic off-cut),
- Place the new seals in an oven at 140°C (+/- 3%) for 30 minutes.
 - ⇒ Do not exceed 200 °C.
 - ⇒ If the temperature is too low, there is a risk that the seal will deform or tear during installation.
- Insert the seal quickly from one side of the groove, then progressively push it into its housing.

NOTE: always insert the seal on the beveled side.

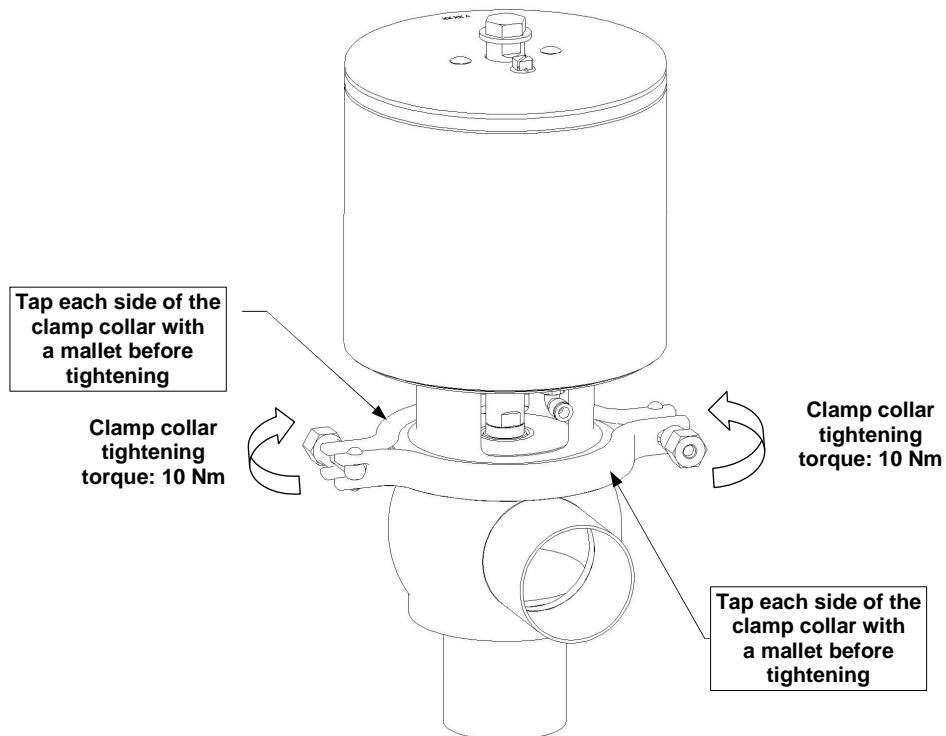

NOTE !

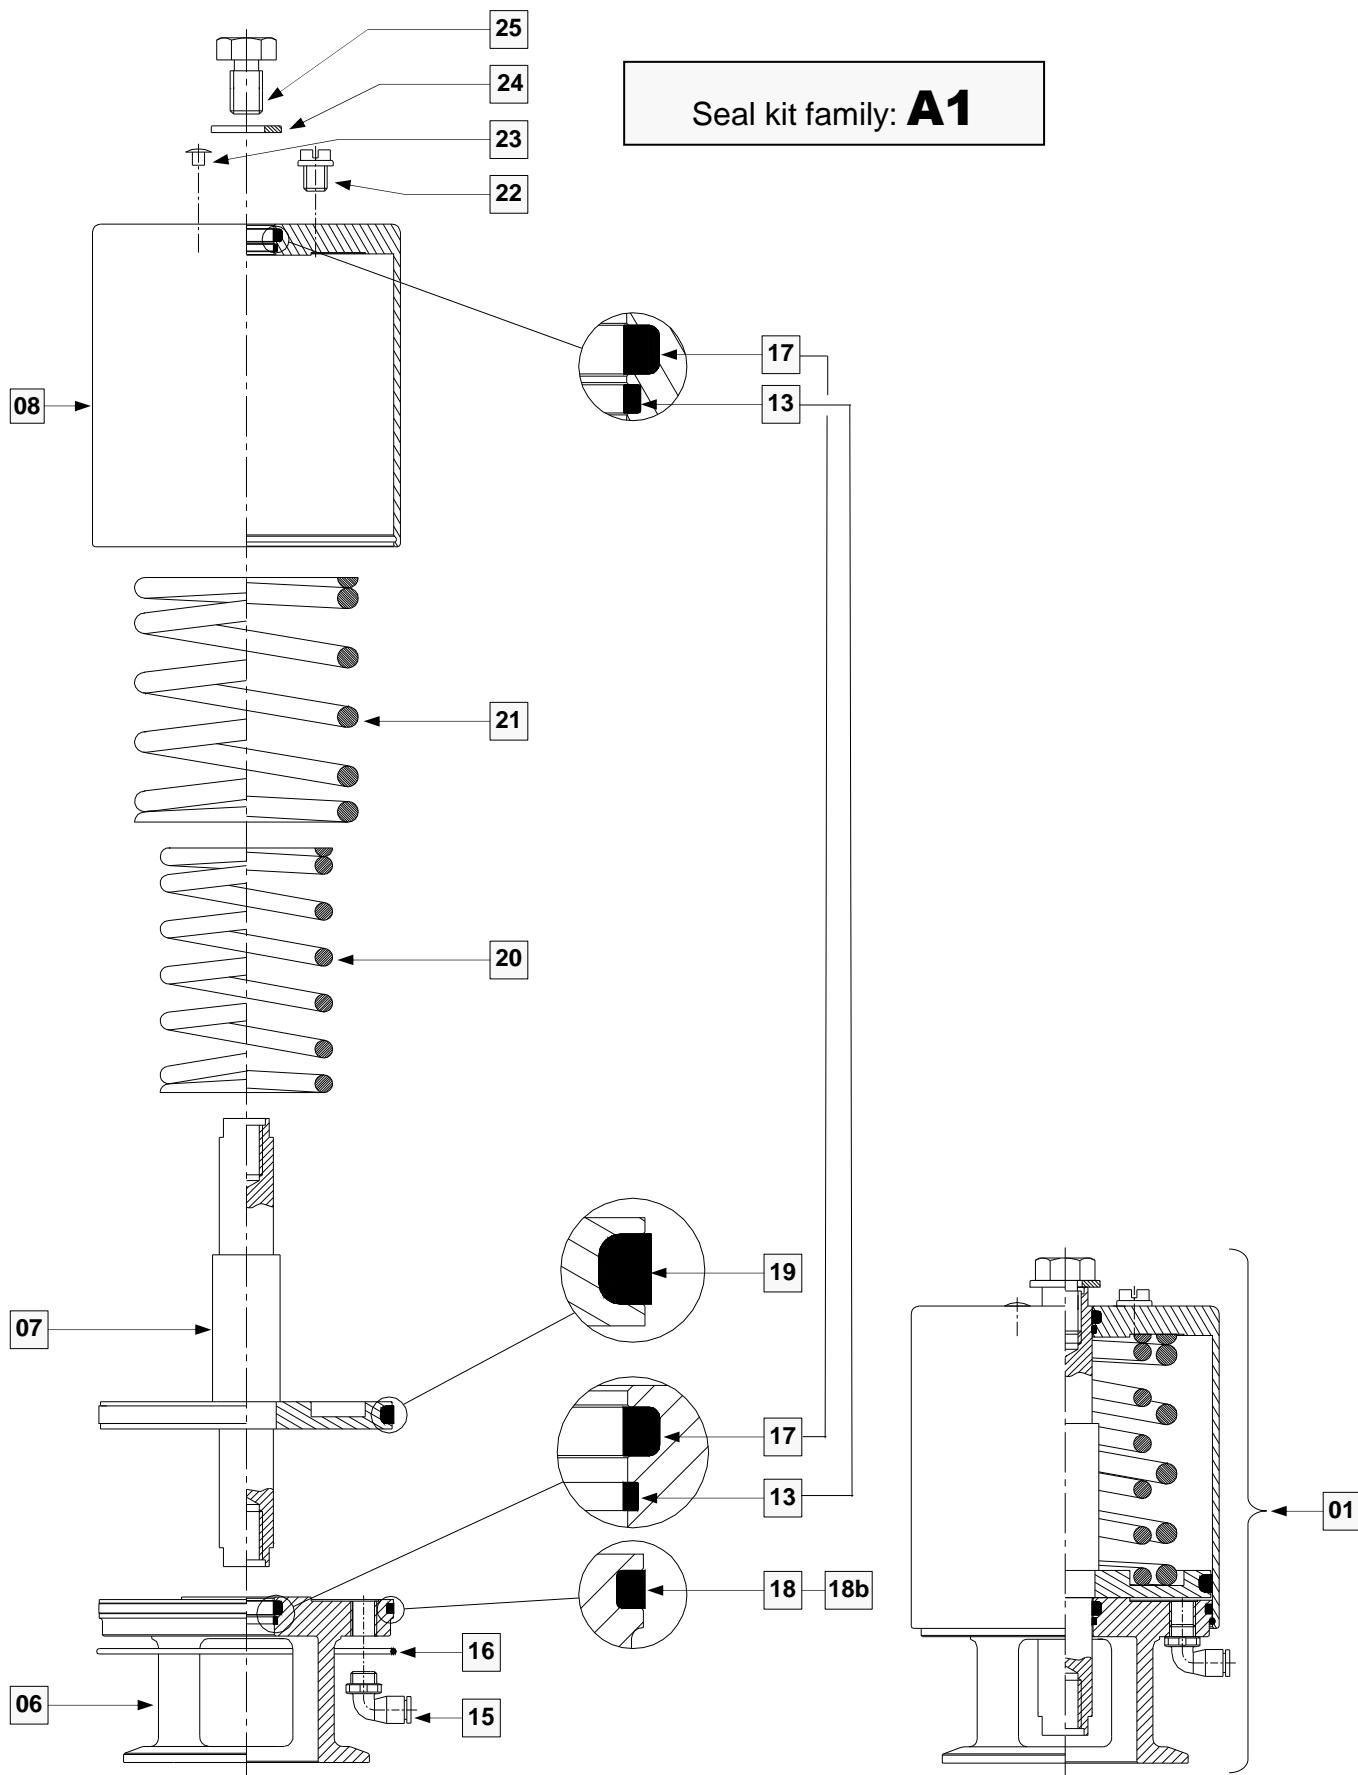

This operation is carried out in the reverse order to disassembly. You should follow the guidelines given below:

- We recommend using a **medium thread lock compound** to lock the plug during reassembly on the actuator and retightening the plug of diaphragm valves after first usage with temperature,
- Do not forgot to supply air to the actuator before tightening the clamp collars,
- Before making the final network connections, check that the valve is operating normally. If you encounter difficulties when performing the operations described here, do not hesitate to contact us,
- You can also contact us regarding maintenance for your valves either on-site or at our own premises.

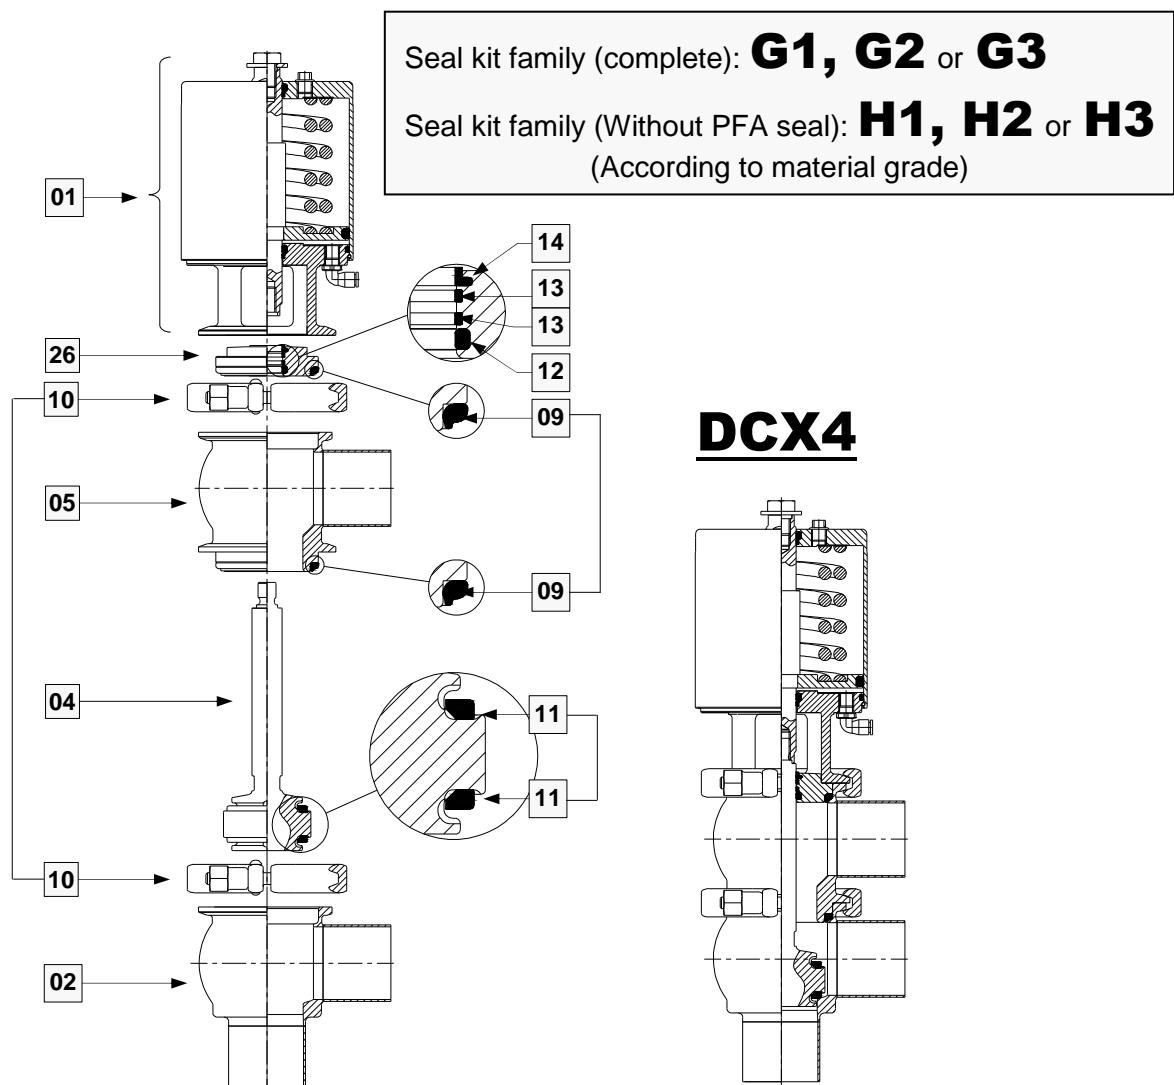

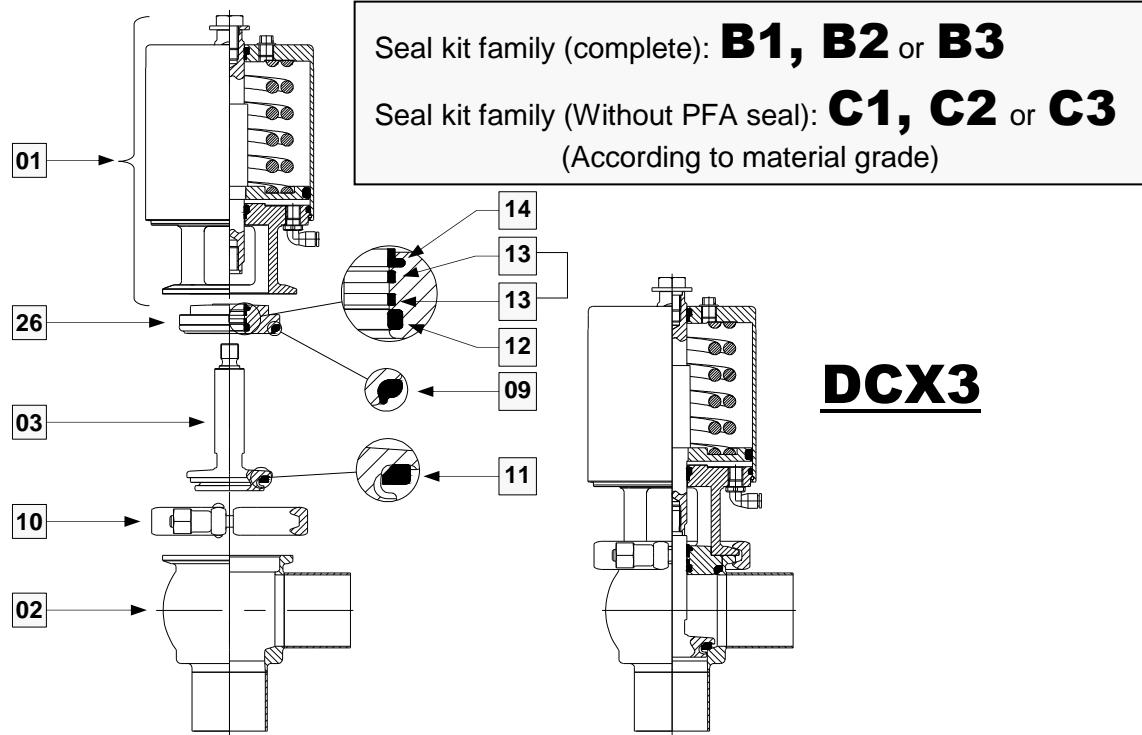

6 PARTS

6.1 STANDARD DCX VALVE ACTUATOR (DCX3/4 PFA)
