

PLTC label tape

- Tape, permanent or removable
- Print with thermal transfer printer
- Perfect for component marking

A soft and flexible universal tape, for indoor and outdoor use. Excellent resistance to moisture, alcohols and oil.

Print the continuous tape in requested length via a thermal transfer printer and Partex software Promark Creator.

General information

The most significant advantage and potential of the PLTC label is its continuous form, which enables to design and print labels of any length. Available in different height..

Vinyl label is characterized by high adhesion and is a perfect solution for rough surfaces and no straight shapes.

Durable acrylic adhesive allows using the tape on many surfaces, including stainless steel and glass.

UV resistance material.
